Professional Summary

Experienced Test Automation Engineer with over 1.5 years of expertise in developing and implementing test automation scripts. Proficient in Java, Python, and Selenium with a solid understanding of OOP principles, data structures, and the Page Object Model. Adept at end-to-end testing including UI/UX, API, integration, performance, and stress testing, SDLC, STLC. Proven ability to work across different time zones and environments, with strong analytical, problem-solving, and communication skills.

Technical Skills

- **Programming Languages:** Java, Python, C++
- **Automation Tools:** Selenium, TestNG, Rest Assured, playwright
- **Testing Frameworks:** Page Object Model, API Automation, Postman
- **Testing Types:** UI/UX, API, Integration, Performance, Stress testing, SDLC, STLC, agile
- **Tools & Technologies:** Eclipse, Jira, maven
- **Database:** SQL, Database Queries
- **Operating Systems:** Linux/Unix, Windows

PROJECT:

PROJECT Name : INTEL R&D, FIV Server_BA_BIOS_IFWI-Val-Se

Duration: February 2022-March 2023

Role: Product Validation Engineer

This is an internal application designed to identify the criticality of release process so that each product can be released easily. It also helps the stakeholders to know all about the product at one step.

ROLES & RESPONSIBILITY:

- Understand the application and analyze requirements
- Prepare Test Cases, Test Data & review it.
- Perform Smoke, Integration, System Testing.
- Performing Regression Testing, Re-Testing & Sanity Testing.
- Identifying the test cases for Automation.
- Write Test Scripts and reusable methods.

- Maintain and Enhance the Framework.
- Wrote and executed **SQL** Statements to verify data from back-end.
- Performed cross-browsing testing to verify if the application provides accurate information in different browsers.
- Prepare Report and presentation to Stakeholders.
- Identifying defect, preparing Bug report and raising & track defect using VersionOne.
- Actively participating in Sprint Planning, backlog Refinement, Retrospective and Standups.
- Converting manual test cases to Automation scripts.
- Executing the automation suite and prepare report.
- Maintaining the Framework(BDD).
- Actively participating in Sprint Planning, backlog Refinement, Retrospective and Standups.

career gap: **(may 2023-sep2024)**

During a career gap from April to September 2024, I dedicated my time to enhancing my technical skills and working on several projects. I successfully completed a Java full stack development project, which honed my abilities in both frontend and backend technologies. Additionally, I deepened my knowledge of SQL and automated API testing using TestNG and Rest Assured. One of my notable projects involved automating JIRA API interactions, which streamlined project management processes and demonstrated my ability to handle complex technical challenges. This period of self-directed learning and project work has equipped me with valuable skills and practical experience, and I am excited to bring these capabilities to the company as Quality test Engineer.

Self-Directed Projects

April 2024 – September 2024

- **Java Full Stack Development:** Designed and implemented a full-stack Java project, including both frontend and backend components, demonstrating proficiency in modern Java frameworks and development practices.
- **SQL Proficiency:** Gained advanced skills in SQL, including database design, query optimization, and complex data manipulation.
- **API Automation with TestNG and Rest Assured:** Developed automated test scripts for various APIs using TestNG and Rest Assured, improving testing efficiency and coverage.
- **JIRA API Automation:** Automated JIRA API interactions for project management tasks, streamlining processes and improving data handling.

CERTIFICATIONS:

Java Full stack course From jspider's
Manual and Automation testing from QSPIDER'S

EDUCATION:

Bachelor's Degree in computer Science
July 2017-sep2021
